A scatter plot with 100 data points. The points are represented as blue circles with black outlines. There is a dense, roughly elliptical cluster of points on the right side of the plot, centered approximately at (75, 50). To the left of this cluster, there are several isolated points or small groups of points, including one at the top left, one at the bottom left, and a few scattered points in the middle-left area. The plot has a white background with a black rectangular frame. There are tick marks on all four sides of the frame, but no numerical labels or titles are present.
